

In some of the hottest months of the year here in California, with summer reaching its peak, Quali is set to have a record quarter with new customers and revenue paths across a variety of different segments including for some of the new use-cases. As digitization places more IT initiatives on the fast path, what better way to improve agility and reduce risk than providing your Dev, Test and ITOps teams with on-demand, self-service environments on any cloud? No wonder Quali won the Red Herring Top 100 award and the EMA Top 3 DevOps and Cloud awards this month while improving productivity, efficiency and speed for enterprises and service providers alike

New Assets

[Video] Top 10 Barriers to DevOps Adoption – and how to overcome them – Watch Shashi Kiran's presentation during DevOps Con conference in Berlin, June 2017

[Demo] Cyber Ranges for Enterprise Applications – Quali's Cloud Sandboxing solution for cyber ranges allows enterprises to rapidly provision full-stack, real-world cyber threat environments in seconds. In this demo you'll learn how you can easily manage the entire lifecycle of modeling, deploying, monitoring, and reclaiming cyber sandboxes.

[Demo] Cyber security Testing with Cloud Sandboxes, Ixia Breaking Point and CypherPath – In this demo you will learn how to use Quali's Cloud Sandboxes to certify infrastructure and application security deployed on CypherPath hyperconverged SDI OS solution. The Ixia Breaking Point solution is also showcased as part of the sandbox to generate simulated attacks on the target application.

[Chalk Talk] Multi-Cloud Solution with Quali Cloud Sandboxes – In this session, Alex Azarh from Quali's Engineering team shows how Quali helps companies modernize their application portfolio at scale, fast and under budget with multi-cloud support.

[White paper] Rolling out Financial Services Applications Faster - Read this white paper to learn how to shift IT infrastructure security, certification and compliance into high gear

In the Media

Judges Honor Quali's Innovative Cloud Sandbox Automation & Orchestration Solution – Quali has been selected by Enterprise Management Associates (EMA) as an "EMA Top Three" vendor in the category for DevOps Security. [Read the Press Release](#)

Quali Chosen As Red Herring Top 100 North America Winner – one of the technology industry's most prestigious awards. [Read the Press Release](#)

CGS Tower Networks smart matrix integration with Quali CloudShell - CGS Tower Networks, announced the general availability of its smart matrix solution and integration with Quali CloudShell. The solution enables the automation of large scale test environments by enhancing capacities and streamlining test processes, resulting in superior QA, improved time to market and significant cost reduction in test equipment. [Read the Press Release](#)

Quali Sponsors DevOps Enterprise Summit London on June 5-6 - Quali joins a community of technology leaders who are helping successfully drive cloud and DevOps adoption in enterprises worldwide [Read the Press Release](#)

In-Depth Interview: Overcoming the Top Barriers to DevOps Success - "Today we see that almost 70% of enterprises want to adopt hybrid clouds. Why not go all-in on public cloud? Well, the reasons are several. The notable reasons are legacy investments made into on-premise data centers, or opting for private clouds for reasons of ownership, cost, or compliance" Shashi Kiran, Quali's CMO [DATAVERSITY](#)

CGS Tower Networks smart matrix integration with Quali CloudShell - The Integration of CGS Smart Matrix with CloudShell allows QA teams to enhance the test environments with additional test generation ports and capacities, new and modern network interfaces, and remote configuration of test-bed scenarios without the need for complex cabling. [CGS Tower networks](#)

90% of firms using DevOps in some capacity – but production applications well down - More than 90% of organisations polled by Enterprise Management Associates (EMA) say they are using DevOps practices in some capacity, yet they only support production applications only a third of the time. [CloudTech](#)

Using Cloud Sandboxes as Stepping Stones to Hybrid Clouds - Hybrid clouds promise the best of both worlds by offering the speed and scale of public clouds combined with the visibility and control of on-premise, IT-owned private clouds. Hybrid clouds also give enterprises the flexibility to take a more measured approach to cloud adoption. [CIO Review](#)

Crafting an Effective DevOps Strategy - DevOps is about moving fast with a focus on continuous integration and delivery (CI/CD). However, speed should not shortchange software quality. Catching bugs later in the release cycle is more expensive and the "redo" effort can create business impact. [Virtual strategy Magazine](#)
