Monthly Newsletter from the leader in sandbox software for DevOps and Cloud Automation

As the demand for multi-cloud solutions continue to grow, we are announcing our partnership and early integration with the Oracle public cloud and the availability of Quali CloudShell on the Oracle cloud marketplace. Quali CloudShell complements Oracle Ravello service offering and brings a multi-cloud sandbox offering in addition to automation and orchestration of the physical infrastructure as well. As the GDPR compliance deadline looms ahead, we've new assets including a webinar and whitepaper. Reach out to us if you're interested in using sandboxes for certification and compliance.
