

SOFTWARE TEST ENVIRONMENTS AS A SERVICE

Release software to production faster

- Build reliable test environments as a foundation for test automation.
- Automate provisioning of your complex software test environments on your hybrid infrastructure.
- Simplify testing. Non-experts easily set up test environments on demand.
- Trust your software testing because it is based on your complex Production environments.

RELEASE SOFTWARE FAST AND WITH CONFIDENCE

“AUTOMATE” YOUR TEST AUTOMATION

Test automation software is great but it is only part of the solution. **You first need to set up your test environments.** Two options to accelerate your testing:

- ✓ **Fast, 1-Click Environments:** Even non-experts can quickly and easily set up Production-like test environments in minutes using an intuitive interface.
- ✓ **Faster, No-click Environments:** Quali’s CloudShell platform integrates directly (Rest API) with your favorite test software and services including SmartBear, Tricentis, and Eggplant. Your test environments are set up automatically with a call from your testing solution.

“Quali’s Cloud Sandbox Software is a great step forward to making DevOps truly effective because it gives tools like Jenkins the ability to deploy full-stack production-like environments on-demand. This makes it possible for DevOps teams to **improve the speed of testing and release automation.**” – Kohsuke Kawaguchi, Jenkins Founder and CTO CloudBees

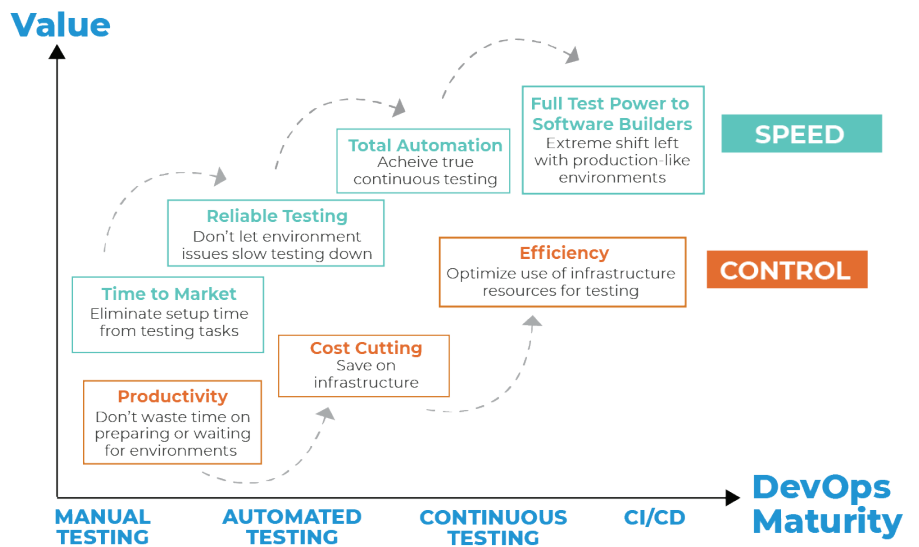

RESULTS ACROSS YOUR ORGANIZATION

QA Engineer	Test Manager	CXO
<p>Benefits</p> <ul style="list-style-type: none"> ✓ Reliable test environments ✓ Efficiency: No more test environment set up hassles ✓ Simple, self-service test environments <p>ROI</p> <ul style="list-style-type: none"> ✓ Productivity ✓ Reduced effort ✓ Focus on testing rather than setup 	<p>Benefits</p> <ul style="list-style-type: none"> ✓ Increase reusability and scalability ✓ Ability to test in your test lab or in the public cloud ✓ Empower non-experts to access dynamic test environments ✓ Be an enabler of faster, quality releases <p>ROI</p> <ul style="list-style-type: none"> ✓ Productivity ✓ Reduced effort 	<p>Benefits</p> <ul style="list-style-type: none"> ✓ Innovation and agility ✓ Higher quality releases ✓ Eliminate manual inefficiencies <p>ROI</p> <ul style="list-style-type: none"> ✓ Faster and higher quality software releases ✓ Control infrastructure cost and security ✓ Unlock the value of your test automation investment

CRITICAL FOR YOUR TESTING

- ✓ Right infrastructure
- ✓ Right applications and 3rd party components on it
- ✓ Right data

With increasing automation levels, the reliability and stability of test environments becomes critical, and **providing access to test environments** in a timely manner **has a direct impact on your innovation speed and time to market.**
